“Food for Thought” Vocational Trainer Hired

Muskegon, Michigan, June 4, 2013

Pioneer Resources has hired Debra Warren as the vocational trainer for the new food service and food to table program, “Food for Thought”. This opportunity was made possible through networking at HEALTHY Muskegon learning journeys; and a partnership with Muskegon Area Intermediate School District.

“Food for Thought” will have its first class of high school students this fall and will offer a variety of skill development opportunities focusing on the food cycle. Topics relating to food service and sustainable agriculture include, but are not limited to: basic sanitation, nutrition, food preparation, institutional food service, machine operation, customer service, cash handling, gardening and composting.

Debra’s passion and background is in nutrition and food service with complementary experience in youth development and sustainable agriculture. It is an exciting time as the “Food for Thought” program continues to develop.
